

## Brief Explanations

### Parking Regulations

On-street parking is prohibited any time City snowplowing or snow removal operations are in progress.

No parking is permitted within 10 feet of a fire hydrant or mailbox.

On-street parking is prohibited from 3:00 to 6:00 a.m., throughout the year, except for persons rendering emergency medical assistance; construction areas where off-street parking is not available; or the driveways is filled to capacity with no space for additional vehicles without extending into the sidewalk area. Motor vehicles should then be parked at the curb in front of that residence.

Vehicles are considered abandoned motor vehicles if:

- Parked on public property over 48 hours, or more than 4 hours on properly posted public property and are in an inoperable condition.
- Parked on private property over 72 hours without permission of the property owner and are in an inoperable condition.
- Parked outside on private property for 90 days or more and are not properly licensed for operation in the state.

No parking is permitted on grass, gravel, rocks, etc. All areas used for parking must be surfaced with concrete, asphalt or pavers.

No more than four (4) vehicles per dwelling unit may be routinely parked or stored anywhere outside on residentially zoned property. An on-site parking permit may be obtained for two (2) additional vehicles.

One commercial vehicle, not over one ton capacity, may be parked at the owner's or operator's residence. No commercial vehicle in excess of one ton or commercial trailer may be parked or stored in a residential district except to load, unload or render a service.
